Hazard Assessment Form

Date of Assessment:	February 4, 2026	Job/position:	General Labourer	Date Reviewed:	Feb 4, 2026
Assessment performed by:	Sandra Tutka	Supervisor:	Peter Godler	Date Implemented:	Feb 25, 2026

		Inherent Risk Before Controls			Hierarchy of Control in Place	Residual Risk After Controls		
Task	Hazards Present	Likelihood	Severity	Risk Level		Likelihood	Severity	Risk Level
Manual material handling (moving pipe, tools, debris)	Heavy materials, awkward postures, injuries, crushed fingers, muscle strains	Probable (3)	Moderate (2)	6	Engineering: Pipe stands, chain falls, mechanical lifts. Administrative: Lift planning, team lifts, rigging procedures. PPE: Gloves, steel-toe boots.	Possible (2)	Minimal (1)	2
Site housekeeping (debris removal, sweeping)	Slips, trips, sharp objects, dust	Probable (3)	Moderate (2)	6	Engineering: Waste bins, debris chutes. Administrative: Regular cleanup schedule. PPE: Gloves, safety glasses, dust mask if required.	Possible (2)	Minimal (1)	2
Working near active hot work (welding/cutting)	Fumes, UV radiation, fire/explosion risk	Probable (3)	Serious (3)	9	Engineering: Welding screens, spark containment. Administrative: Restricted access zones, hot work awareness. PPE: Safety glasses, FR clothing if in hot work zone.	Possible (2)	Moderate (2)	4
Working around mobile equipment	Moving vehicles, blind spots, struck-by or run-over injuries	Probable (3)	Catastrophic (4)	12	Engineering: Barriers, defined walkways. Administrative: Site safety meetings, traffic control plans. PPE: High-visibility clothing, hard hat, safety boots.	Probable (3)	Moderate (2)	6
Use of power tools (drills, saws)	Kickback injury, vibration, noise, hearing loss	Expected (4)	Serious (3)	12	Engineering: guards. Administrative: Tool inspection program, training. PPE: Gloves, hearing protection, eye protection.	Possible (2)	Minimal (1)	2
Assisting with rigging or moving materials	Suspended loads, shifting objects, struck-by, caught-between, fatal injury	Probable (3)	Catastrophic (4)	12	Engineering: Certified lifting devices, tag lines. Administrative: Qualified riggers, exclusion zones, lift plans. PPE: Hard hat, high-vis, gloves, safety boots.	Possible (2)	Minimal (1)	2

Hazard Assessment Form

Exposure to industrial noise	Noise-induced hearing loss	Possible (2)	Serious (3)	6	Engineering: Noise-dampening barriers. PPE: Hearing protection.	Possible (2)	Minimal (1)	2
Exposure to dust and airborne contaminants	Silica dust, welding fumes, general construction dust, respiratory irritation, lung issues	Possible (2)	Serious (3)	6	Engineering: Wet methods, ventilation. Administrative: Limit time in high-exposure areas. PPE: Respirator if required.	Possible (2)	Moderate (2)	4
Slips, trips, and falls on job sites	Uneven ground, debris, wet surfaces	Expected (4)	Moderate (2)	8	Engineering: cable management. Administrative: Good housekeeping, site orientation. PPE: Slip-resistant, safety boots.	Possible (2)	Minimal (1)	2
Working in hot or cold environments	Dehydration, heat stroke, frostbite	Possible (2)	Serious (3)	6	Engineering: Heated/cooled break areas. Administrative: Work-rest cycles, hydration. PPE: Weather-appropriate PPE.	Possible (2)	Minimal (1)	2
Handling garbage or scrap materials	Sharp edges, biohazards, cuts, punctures, infection	Probable (3)	Moderate (2)	6	Engineering: Proper waste containers. Administrative: Safe disposal procedures. PPE: Cut-resistant gloves, safety boots.	Possible (2)	Minimal (1)	2
Shop/office support housekeeping	Wet floors, cleaning chemicals, slips, skin/eye irritation	Remote (1)	Moderate (2)	2	Substitution: Low-toxicity cleaners. Engineering: Clearly labeled storage, ventilation. Administrative: WHMIS training, spill cleanup procedures. PPE: Gloves, safety boots	Remote (1)	Minimal (1)	1
Working at heights (ladders, lifts, scaffolds)	Falls from height, falling tools/materials	Probable (3)	Catastrophic (4)	12	Engineering: Guardrails, lift platforms. Administrative: Fall protection plan, ladder safety training. PPE: Fall arrest harness, hard hat.	Possible (2)	Minimal (1)	2
Interaction with other trades / mobile equipment	Struck-by moving equipment, dropped materials, serious injury, fatality	Probable (3)	Catastrophic (4)	12	Engineering: Barriers, defined walkways. Administrative: Site safety meetings, traffic control plans. PPE: High-visibility clothing, hard hat, safety boots.	Probable (3)	Moderate (2)	6
Exposure to opioids or other controlled substances	accidental contact, inhalation, or ingestion which may result in overdose, respiratory depression, or other serious health effects	Possible (2)	Catastrophic (4)	8	Elimination: Avoid entering high-risk environments. Engineering: Use barriers, proper ventilation. Administrative: Training on hazard recognition, safe handling procedures, incident response PPE: gloves, masks	Remote (1)	Moderate (2)	4

Hazard Assessment Form

Level of Risk Chart

Likelihood: The likelihood parameter looks at the chance of a negative situation occurring.

Severity: Severity measures the degree of harm that exposure to the hazard could result in.

The level of risk is determined by the equation: **Likelihood x Severity = Risk** as per the table below.

Risk Chart		Likelihood of Occurrence			
		Expected (4) Very likely to happen	Probable (3) Could happen	Possible (2) A chance it could happen	Remote (1) Very unlikely to happen
Severity	Catastrophic (4) Death, critical injury, property damage over \$10K	16	12	8	4
	Serious (3) Medical Aid, lost time, property damage over \$5K	12	9	6	3
	Moderate (2) First Aid, Minor illness, Property damage over \$1K	8	6	4	2
	Minimal (1) No injury, minor damage	4	3	2	1

The risk score is then used to determine a risk category which will dictate actions required to manage the risk.

Risk Score Level	Risk Category	Action Required
16	Severe	Stop work immediately, implement controls to reduce the risk
9-12	High	Consider additional controls to reduce the risk. Create a Safe Work (Job) Procedure
4 -8	Medium	Consider additional controls, Create a Safe Work Practice
1 - 3	Low	Minimal risk, monitor the operation

Hierarchy of Controls

Most
effective

Least
effective
